

Mobile shelving systems maximise your storage area creating additional workspace. Eliminates multiples access aisles and passage ways.

- \\ Low profile tracks do not require fixing and can be placed on top of most existing floor surfaces
- \\ System quick to install, relocate or reconfigure
- \\ Shelving can be configured to store a variety of different sized media
- \\ No heavy base required, keeps floor loads to a minimum
- \\ Effortless push-pull movement
- \\ Option of powder coated coloured front panels
- \\ GECA Approved range available on request.

Mobile shelving systems configured in tandem or multiple bay width, require mechanical or electrical assistance to reduce operator strain.

- \\ Easy drive console with chain and drive cog allows fully loaded bays to be moved with minimal effort -- recommended for any system wider than 1800mm
- \\ Does not require preparation of floor surface
- \\ The 15mm low profile tracks are trolley and wheelchair friendly
