SUSTAINABILITY CERTIFICATIONS

As a proud Australian manufacturer, sustainable practices are an important part of our manufacturing capabilities. We maintain a conscious commitment to environmental and social sustainability and achieving our goals across all of our operations. Together, we're re-imagining surfaces to shape better spaces—made for all Australians and made for good.

ENVIRONMENTAL PRODUCT DECLARATIONS (EPD)

Environmental Product Declarations (EPD) present transparent, verified, and comparable information about the life-cycle and environmental impact of products and services.

Laminex's independently verified EPDs provide important product-specific emission data to help the industry measure and reduce embodied carbon emissions in their projects. Recognised under the Green Building Council of Australia's Responsible Products Framework, our EPDs contribute to credits for responsible finishes, upfront carbon, and lifecycle impacts within Green Star tools.

These technical disclosures complement our suite of sustainability, product transparency and responsible sourcing certifications.

Download EPDs here: epd-australasia.com/company-epd/laminex-au

GECA CERTIFICATION

Laminex Australia is proud to offer a range of Good Environmental Choice Australia (GECA) certified products. GECA is Australia's only independent, not-for-profit, multi-sector ecolabelling program and the only Australian member with GENICES recognition from the Global Ecolabelling Network (GEN). When you see a GECA eco-label you know that the product or service you are considering has been rigorously assessed for its environmental impact over its lifecycle and that it is a better choice for you, your family, colleagues and our planet.

One lifecycle ecolabel to cover:

- Environment
- Social Impacts
- Human Health
- Fit for Purpose

In choosing to certify our products with GECA, Laminex has committed to meeting the highest environmental and ethical standards in production and materials. For more information please visit: www.geca.eco

DECLARE LABEL

Laminex holds Declare Red List Approved labels for its manufactured products. The Declare label, developed by the International Living Future Institute (ILFI) discloses: all ingredients in the product, down to 100 parts per million (ppm) manufacturing location and end-of-life options compliance with the Red List.

The Red List is a list of chemicals and materials considered harmful to human well-being and the environment, commonly found in building products. Achieving Declare certification shows Laminex's commitment to material health and sustainability, and helps our customers to make informed choices for healthier spaces.

TIMBER CERTIFICATION

As one of Australia's largest manufacturers of wood products, Laminex supports responsible forest management and is committed to producing quality products from quality materials that are backed by globally recognised certifications. We source our raw materials from suppliers who have been independently verified as compliant to chain of custody standards, meaning that materials are produced using wood fibres sourced from certified sustainably managed forests to Responsible Wood/PEFC (Programme for the Endorsement of Forest Certification) Certifications.

Our manufacturing facilities hold their own PEFC certifications. This means all certified wood products from these facilities can be traced from plantation to final manufactured product.

SUSTAINABLE MANUFACTURING INITIATIVES

Laminex Australia also maintains ISO 14001 Environmental Management System certification for all manufacturing sites and is progressively embarking on a number of waste and emission reduction initiatives to reduce our overall environmental impact.

Find all of our documentation, certificates and reports at laminex.com.au/about-us/sustainability

Now more than ever, we understand the importance of maintaining hygiene in interior spaces we frequently touch, such as cabinetry, benchtops, tabletops and toilet and shower partitioning. Laminex has taken the lead with the introduction of Protec+, an antimicrobial surface technology that inhibits the growth of bacteria, fungus and now COVID-19 virus. Protec+ is now manufactured as standard into selected Laminex high-pressure laminate (HPL), including AbsoluteMatte® HPL, as well as Laminex Multipurpose Compact Laminate, Laminex Aquapanel® and Laminex Structural MR® MDF.

PROTEC+ FAST FACTS

PEACE OF MIND

Laminex Protec+ properties do not wipe off or leach out of the surface. This gives you enhanced antimicrobial protection for the expected life of the surface.

CLEANER ENVIRONMENTS EVERYWHERE

Laminex Protec+ can be used to create a safer, cleaner environment anywhere, including hospitals, schools, hotels, shops, cafés, sport facilities and public toilets.

PROVEN EFFECTIVENESS

Laminex Protec+ has been independently tested in accordance with a number of leading standards, including: ISO22196:2011, ISO 21702:2019, JIS Z2801 and ASTM G21, which measure antimicrobial activity, fungi resistance and COVID-19 virus resistance.

NEXT GENERATION WOODGRAINS

Marked by a new level of authenticity, scale and occasion, our Next Generation Laminex Woodgrain décors allow moments of wonder and beautiful interiors to take shape with a genuine sense of place, highlighted by a range of Australian Native décors.

With our premium AbsoluteGrain® finish, for a more authentic look and feel, and Laminex TrueScale® technology for no repeat designs, this remarkable range includes six native Australian woodgrains, three oaks and three walnuts, all designed to complement the existing range of Laminex décors.

TRUE TO NATURE, NEXT GENERATION WOODGRAINS SPEAK TO OUR LOVE OF THE AUSTRALIAN NATURAL ENVIRONMENT, AND OUR DEDICATION TO PROVIDING THE BEST POSSIBLE SURFACE SOLUTIONS FOR AUSTRALIAN SPACES.

AUSTRALIAN NATIVE WOODGRAINS

Inspired by the world around us and crafted in consultation with our local design industry, the Laminex Australian Natives Collection embraces the vivid spectrum of our expansive native landscape.

Taken from all corners of the country, six décors have been developed from Australian timber veneers, maintaining the traits and characteristics of their existing grain structures to ensure the most natural of outcomes.

As a result, this collection provides an authentic alternative to timber veneers, eliminating the need to remove timber from Australian Native forests and providing a responsible and durable option for our spaces.

LAMINEX ABSOLUTEGRAIN®

Laminex AbsoluteGrain® is a premium woodgrain finish featuring subtle textural variation and intricate detailing to achieve the organic look and feel of natural timber.

Years of research and development have led to a tactile finish that makes our Next Generation Woodgrains not just an authentic surface solution but an unmatched and legitimate veneer alternative, with the durability, sustainability and quality of Laminex.

LAMINEX TRUESCALE®

Laminex TrueScale® is a celebration of scale and authenticity. In a market first, realistic, no-repeat designs of natural timber and stone are now available, expanding the possibilities of what can be achieved with laminate surface solutions. Extensive research has enabled Laminex to achieve the intricate detail of marble and woodgrains at a scale previously unavailable in Australia. The development of cutting-edge technology and a dedication to the Australian design industry has meant Laminex can offer the most realistic, no repeat laminate designs on the market.

Laminex TrueScale® brings all the recognised hallmarks of Laminex durability and resilience stain, heat, water and scratch resistance, while remaining UV stable. Traditionally, printing organic mineral and woodgrain textures at this scale would be practically impossible, yet with Laminex TrueScale®, lengths of up to 3600mm can be achieved with no repeat, for true to life results and remarkable authenticity.

Both our Mineral and Woodgrain TrueScale™ ranges are suitable for horizontal applications—benchtops and flat surfaces—and vertical applications—wall panels, cabinets, and panels. Offering enhanced flexibility and authentic textures compared to natural stone and woodgrains, Laminex TrueScale® can be paired with ABS Edging in 15m × 38mm × 1mm rolls to provide realistic and hardwearing edges for benchtops, shelves, and cabinets.

A select range of our Woodgrain TrueScale™ range are available in our Laminex Architectural Panels range for both wall and ceiling applications to work cohesively with our board and laminate range.

LAMINEX ARCHITECTURAL PANELS

Introducing Laminex Architectural Panels—an evolution in walls and ceilings. Designed and made in Australia, Laminex Architectural Panels seamlessly integrate walls, ceilings and joinery to create considered spaces full of architectural detail. With an array of décors and profiles, the design possibilities are virtually endless.

WALLS

Laminex Architectural Wall Panels have been created using a wide selection of realistic woodgrain décors from the Laminex Colour Collection, available in Batten, Planked and Flat profiles to ensure seamless integration through your next project.

The Classic Flat profile offers a modern reversible panel allowing you to choose between a 1mm pencil joint or a 7mm express joint.

Effective Coverage: HxW (mm)

Laminex Architectural Wall Panels are MDF MR, Fire Group 3 rated.

PROFILE	PANEL SIZE HXW (MM)	EFFECTIVE WIDTH HXW (MM)	THICKNESS (MM)	PACK QTY	EFFECTIVE COVERAGE (SQM)	FIRE RATING
Classic Flat	3000 x 1200	3000 x 1174	12	1 panel	3.52	Group 3

CEILINGINGS

Laminex Architectural Ceiling Panels is a range of prefinished ceiling panels and tiles designed to make an impact wherever they are used. The range features a selection of popular Laminex woodgrain décors in three linear profiles, bringing textural interest and the warmth of timber to any space. Ideal for both retrofit and new ceiling systems, this collection of tiles and panels offers direct fix or suspended ceiling options suitable for a range of projects. The large-format panels feature unique, removable tongue-and-groove joints, enabling a variety of panel layouts for versatile design possibilities.

LARGE FORMAT COMMERCIAL: LAMINEX STRUCTURAL MR® MDF

The Laminex Large Format Commercial Range comprises the most popular Laminex décors, in versatile 3600 x 1800 panels for applications such as cabinetry, wall panelling, partitioning and office furniture.

For demanding projects where surface hygiene and durability are required Laminex Structural MR® MDF is recommended. This range provides superior impact resistance, with the 18mm version even featuring an extra high density core for up to twice the impact resistance of Laminex Decorated Particleboard 18mm.

Laminex Structural MR® MDF also includes Protec+ antibacterial and antifungal technology which has been proven effective against COVID-19, reducing the amount on the surface by 88% after 24 hours in independent testing (ISO 21702:2019).

FIREGUARD® DÉCOR

Perfect for Ceiling and Wall Lining applications, this Group 2 fire-rated Moisture Resistant, Medium Density Fibreboard is decorated on both sides with a hard-wearing melamine surface. With excellent fire retardant and machining properties, Fireguard® Décor is ideally suited for wall and ceiling applications. Offered with a practical Grey Core in 16 popular décors, the Laminex Fireguard® Décor range will create a unique design feature in any commercial space.

All décors are available in either a 2400 x 1200 x 12mm sheet for ceiling linings or a 3600 x 1200 x 18mm sheet for wall linings.

In addition to the stocked offer, the full range of Laminex Colour Palette colours can be supplied as Laminex Fireguard® Décor in the sheet size/thickness options listed below. Lead times and minimum quantities apply and are detailed below.

DÉCOR FEATURE: THE LAMINEX PLYWOOD SERIES

Laminex Plywood Décors have been painstakingly designed to deliver the authentic appeal of real plywood with the hard-wearing performance of Laminex.

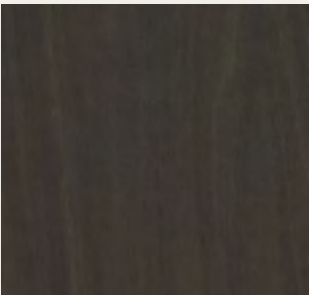

BENEFITS OF LAMINEX DÉCORS PLYWOOD LAMINATE OVER PLYWOOD

The Laminex performance characteristics – durability, cleanability and ease of maintenance, stain resistance, UV resistance and colour stability – are the most obvious reasons for specifying Laminex Plywood Décors over real ply, but there are others. Installation is much simpler, for example, because the laminated panel is pre-finished, there’s no lacquering or staining; it just has to be cut to size and edged.

Laminex manufactures Plywood Laminate locally in Australia which creates a supply chain and cost advantage, compared to the imported plywood materials that can have logistics issues.

LABORATORY COMPACT LAMINATE

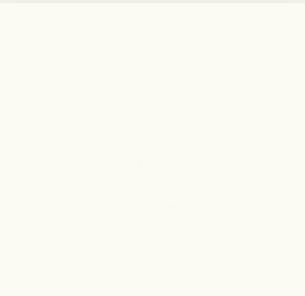

Worktops are a critical element of laboratory furniture and the selection of material used is vital to the efficient and effective functioning of the laboratory environment. Laminex Laboratory Compact Laminate is the premium choice for vulnerable surfaces, with superior moisture, wear and chemical resistant properties. With machinability similar to that of hardwood, it’s a versatile material that can easily incorporate sinks, drip-cups and tap-holes.

Laminex Laboratory Compact Laminate is proudly made in Australia.

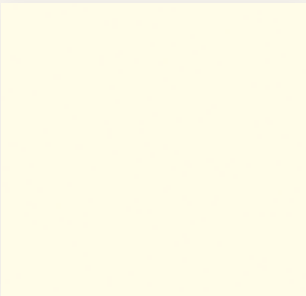

Laminex Laboratory Compact Laminate features an Electron Beam Cured (EBC) surface for enhanced chemical resistance and hygienic properties.

Tested against 130+ chemicals, including Silver Nitrate, making this surface suitable for both horizontal and vertical applications in spaces that require the use of harsh chemicals or vigorous cleaning regimes.

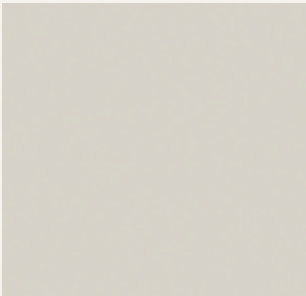

It resists acids, alkalis, corrosive salts and other destructive or staining substances, and is graffiti resistant.

Legend CB Carbide Finish

MADE TO MEASURE COMPACT LAMINATE

The Laminex Made-to-Measure offer is a hassle-free, ready-to-install compact laminate panel solution. This service easily allows customers and tradespeople to use compact laminate for a variety of internal and external applications, and is ideal for large or small projects, from alfresco kitchens – including doors, panels and benchtops, to restaurant tabletops, laboratory benchtops and doors, and loose commercial furniture.

PAY FOR ONLY WHAT YOU NEED

Panels are customised and charged on a square metre rate: you only pay for what you need. No minimum order applies to this offer.

**NO ADDITIONAL DELIVERY FEES AND
CONVENIENT LEAD TIME**

Regardless of the order size or location, you are only charged with the standard Laminex ‘first order of the day’ fee. From when your order is accepted, our standard lead time is only 10 business days plus delivery. For larger orders, the standard lead time may be impacted. We will inform you of your new lead time once it is entered into the system.

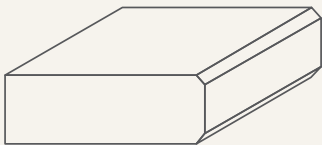

SUPERIOR QUALITY SUBSTRATES

Made-to-Measure Compact Laminate is available in all grades of Laminex Compact Laminate, which are proudly Australian made. All substrates are Global GreenTag certified and feature Protec+ Antimicrobial Technology for added protection and peace of mind.

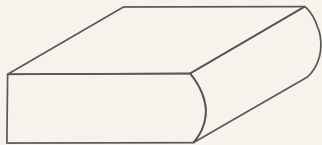

NO NEED FOR SPECIALTY EQUIPMENT

There is no need for specialist cutting and lifting equipment, as the compact laminate panels are custom made – including the option of routing and pre-drilling for handles and hinges – to meet your design needs.

METALLIC LAMINATES

The refined glamour of metallic surfaces and features is timeless. From brilliant accents to statement panelling, metallics bring drama and sophistication to any space.

Elevate commercial interiors with our innovative collection of radiant metallic surfaces, manufactured from real metal foils. Featuring tones found in the tapware, handles and hardware industry, this range has an option for all projects.

TECHNICAL DETAILS

SHEET SIZE	THICKNESS	WEIGHT	FINISH
2400mm x 1200mm	0.8mm to 1.3mm	1.5kg/m2 approx (1mm)	Various

Note: Special fabrication requirements apply to Brushed Stainless Steel laminate. Not to be used in high humidity environments as corrosion of the metal foil may occur. Care should be taken with handling and fabrication as damage to the protective surface lacquer will lead to corrosion of the metal. Avoid metal to metal contact when using fittings; use a mastic or gasket to prevent metal to metal corrosion.

CUSTOMART® SURFACES

Laminex CustomArt® Surfaces help you build exciting, dynamic and ever inspirational interiors. Made locally in Australia, they are custom built to ensure you achieve your ideal vision. Perfect for just about any internal application, you can choose a design from our exclusive collection of colours, patterns, photographs or text, or create your own unique palette or print. Whatever you decide, the result will be outstanding. So for eye catching doors, walls, benchtops, ceilings and more, explore the stunning possibilities with Laminex CustomArt® Surfaces.

Laminex CustomArt® Surfaces offer a range of laminate grades. This means they can be used for internal application.

STANDARD LAMINATE (XTRA GRADE)

CustomArt® Xtra Grade is a general purpose laminate for interior applications, including benchtops, tabletops, furniture, wall murals, interior signage and exhibition displays. Its hard surface finish provides added durability against scratching, wear and graffiti. CustomArt® Xtra Grade requires bonding to a suitable substrate prior to installation.

To learn more about the process visit laminex.com.au

COMPACT LAMINATE

With enhanced durability and impact resistance, CustomArt® Compact Laminate is the perfect solution for custom furniture, lockers, tabletops and so much more.

Laminex Writable Surfaces help you turn every day surfaces into dynamic zones for sharing and collaboration. The magnetic laminate panels have a decorative face which can be written on with a whiteboard marker and easily cleaned. With product options that include an embedded metal foil layer to ensure magnetic objects hold strongly to the surface, Laminex Writable Surfaces are the ultimate functional solution for creative spaces.

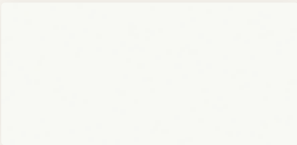

The Laminex Writable Surfaces range is perfect for school or university classroom walls, office wall or partitioning surfaces, meeting and board rooms and restaurant menu boards, tabletops and desktops.
